July 25, 1997

TO: Minerals File

FROM: Tom Munson, Reclamation Hydrologist *RM*

RE: Site Inspection, David L. Penney, Sliver 1-4 Mine, S/001/035, Beaver County, Utah

Date of Inspection: May 21, 1997  
Time of Inspection: 3:00 p.m. - 5:00 p.m.  
Participants: Tom Munson, DOGM

## North Pit

The purpose of the inspection was to determine the amount of disturbance associated with the North Pit of the Sliver 1-4 claims. After mapping the area it was determined that there are a handful of small exploration sites.

The operator has built a new road and turned his old road into a dump area. It is no longer accessible. The pit has not been enlarged since the last inspection of April 1996.

## South Pit

This area is basically the same as the last inspection in April 1996. It has been mined deeper and back into the hillside. Photos were taken to document the site visit.

## Note to file:

Division staff prepared Mr. Penney's 1996 annual report based on this inspection.
